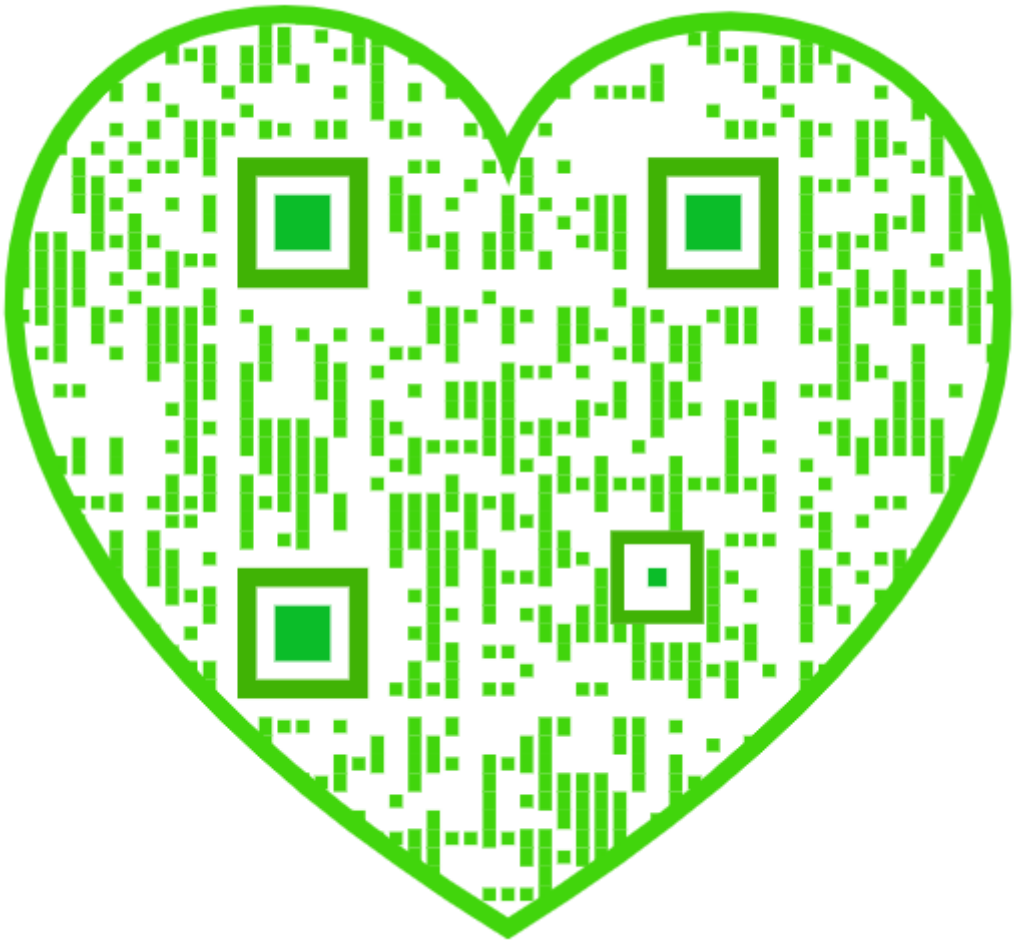
DRAKE MARBLE & TILE CO.
ST. PAUL, MINN. MINNEAPOLIS, MINN.

GAS GRATES OF ALL KINDS IN CATALOGUE E"



The fireplace goods offered in this catalogue are selections from the latest and best patterns. While all are not carried in stock, they can be furnished on short notice.

Grates can be furnished in any desired plating. The regular finishes are:

W. I.	Wrought Iron or Black.	O. B.	Oxidized Brass.
B. B.	Bright Brass.	B. C.	Bright Copper.
L. B.	Brush Brass.	A. C.	Antique Copper.
A. B.	Antique Brass.	O. C.	Oxidized Copper.

Oxidized Copper or Brass are considered the best plating to stand climate and heat.

Special finishes, for which an extra charge will be made, are:

Extra Bright Brass, Gold Finish, Mat Gold Finish.

Sand Blast Brass, Sand Blast Copper.

Special care must be taken in ordering special size frames to state whether **inside** or **outside measure** is given. All measures will be **considered as outside,** unless otherwise specified. If opening in fireplace is given, state whether entire face of frame is to lap on the facing, or only usual lap of ¼ inch.

In giving sizes always state **width first.**

We will not hold ourselves responsible for mistakes that occur, unless these instructions are carried out.

MONARCH AND BUCKEYE

PORTABLE OR SET GRATES.

The continued use for over thirteen years of the Double Draft Portable Grates, or Fireplaces, has proven that they are the most **economical, practical and satisfactory** fireplaces made. They have the advantage over the regular common brick setting in that they are—

A complete Grate all mounted ready for setting.

They require no fire brick or fire tile in setting.

They can be set by any mason.

They overcome imperfect chimneys.

They prevent smoky chimneys and puffing of smoke into the room.

The dampers can be so operated as to control the fire. By opening the lower damper, which is directly over and close to the fire, it forms a strong direct draft, which, as soon as it heats the flue, forms a rapid current of air, thus carrying off the dense smoke. When the fire is well under way the lower damper can be closed, the upper one remaining open. The heat is then reflected into the room.

The upper damper in all grates is operated with a malleable iron thumb-screw.

This damper can be closed tight when grate is not in use, preventing dust or soot from entering the room.

Has a loose cross piece between the upper and lower dampers, which prevents it from cracking or warping, and can be easily replaced. This piece can be removed in setting the grate, so as to leave the top free and open, and permit of easily wiring the grate back and plastering up the hood. This is a feature which is contained in no other grates.

Some of these grates are so arranged that they can be operated same as a stove, and fire can be kept for an indefinite period.

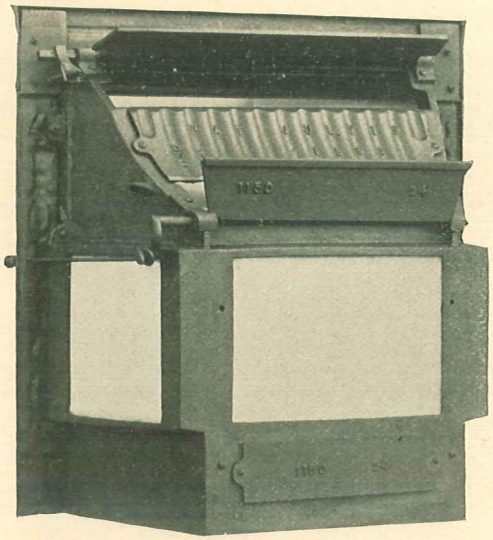
They are also provided with shaking bottoms.

They are all brick lined, or iron backed, with air chambers at the side, and require tile only at the rear of the fire.

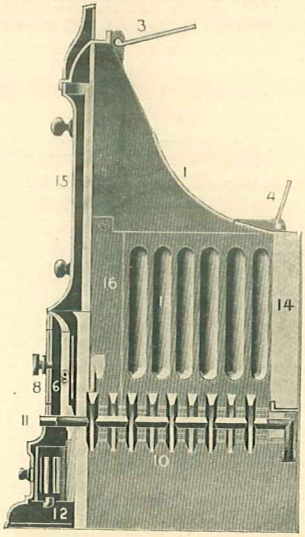
Each kind is fully described in this book.

NOTE.

In setting a Monarch or Buckeye Grate, the fireplace must be built up (allowing room for the damper rods and handles to work freely) the shape of the back, with ¾-inch air space all around to allow for expansion, and to prevent the metal from burning out. Never wall in tight. The floor should be level so the frame will fit tight against the tile. It will not draw if there is a pocket in the rear. Then you should plaster from the hood up, making a smooth arch, but not so much as to crowd the upper damper.



Side and Rear View of back for Monarch Grate, showing Upper and Lower Dampers.



No. 1. Cross-piece, loose.
3. Upper damper.
4. Lower or direct damper.
6. Ash space between baskets.
8. Outside basket, with slide.
9. Inside basket, or fire front.
10. Shaker fingers.
11. Shaker head.
12. Ash screen, or crown piece.
14. Fire tile.
15. Summer piece.
16. Jamb, which can be removed so as to replace tile.

THE IMPROVED MONARCH GRATE.

Ranks first among Portable Grates or Fireplaces.

The leading feature of this grate wherein it excels all others is—

Its curved corrugated top, which reflects the heat into the room.

Improved method of operating upper damper (with thumb-screw), which permits it to be opened any desired width without danger of dropping.

Damper attachments are of malleable iron.

Extra-heavy grate bars. Back bar and trunnions are protected under back, preventing same from warping or being clogged with cinders.

It has double basket with extra-wide space between them, which allows the ashes to fall behind the screen.

The above improvements are not found in any other grate made.

It also has—

Damper in both basket front and ash screen, whereby fire can be kept under control an indefinite period, same as a stove.

Fire pot is full lined with fire tile to a height that will protect back from live coals. The tile can be renewed without removing the grate.

The shaker head is of malleable iron. The grate bottom, besides freeing itself of ashes when being operated, opens up the fire and does not jar the grate from position.

All parts are extra heavy and so constructed as not to be easily burned or warped, and can be readily renewed if necessary.

Hoods of all Monarch frames are double, or lined, so as to preserve the plating.

THE NEW MONARCH.

The latest of all grates.

Has all known modern improvements.

Has more desirable features than any grate made.

Has the largest fire pot of any grate made.

Has no metal exposed to fire except back damper.

Has curved tile top, very thick. The curved shape reflects the heat into the room.

Top tile is so arranged that cracking of same will not injure the grate.

Has double basket front with damper in same. Ashes fall between these baskets under grate.

Has damper in ash screen so as to control the fire.

Has double or lined hoods to frames so as to preserve the plating.

Has three top dampers:

Upper, or flue damper, operated by our improved thumb screw attachment, whereby damper can be opened any desired width with great ease, controlling the draft up the chimney, and can be closed tight to prevent dust or soot from entering the room.

Direct, or lower damper, which is used in starting the fire; being directly over the fire, acts the same as a blower, carrying off first heavy smoke and gases, soon heating the flue, thus producing a quick fire and overcomes smoking chimneys. This damper is to be closed as soon as fire is under way, so as to reflect heat into the room.

Down, or check draft damper. This damper controls a flue 1½ wide from base of grate under fire to top of back. This flue is to be used in checking and preventing draft through the fire, causing a down draft, whereby fire can be kept alive, consuming limited amount of fuel. It is also used when shaking the grate, to carry the dust up the chimney.

Extra-heavy rocker shaker bottom, with trunnions and back bar protected from fire under back.

Back bolted together, allowing for expansion.

Fire tile above fire bed set in asbestos cement.

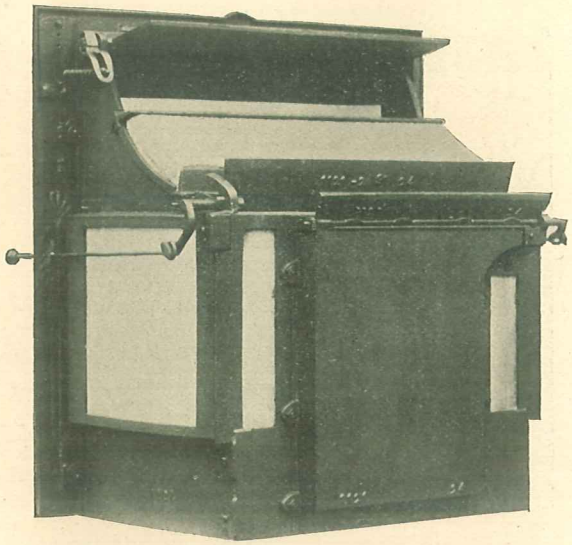
Size of fire pot, front 24, back 21½, depth 10 inches.

Outside depth of grate over all, 16 inches.

Width of back over all, 28½ inches.

Shipping weight, 17 tile, 370 pounds.

Shipping weight, 16 tile, 325 pounds.



Side and Rear View of the New Monarch, showing dampers, tile top and down draft flue. Note mode of holding top tile in position. Also screw arrangement to open upper damper.

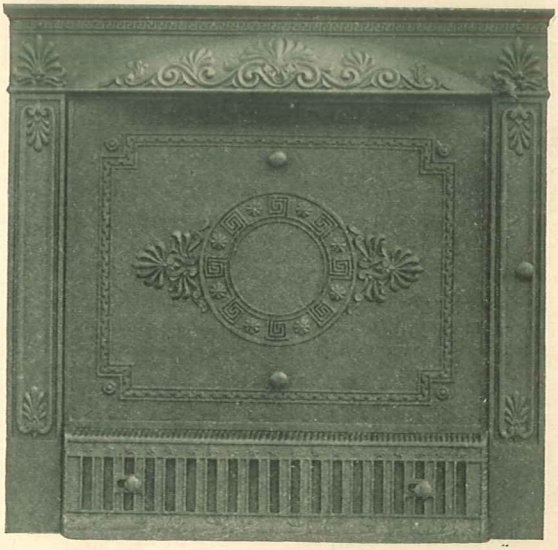
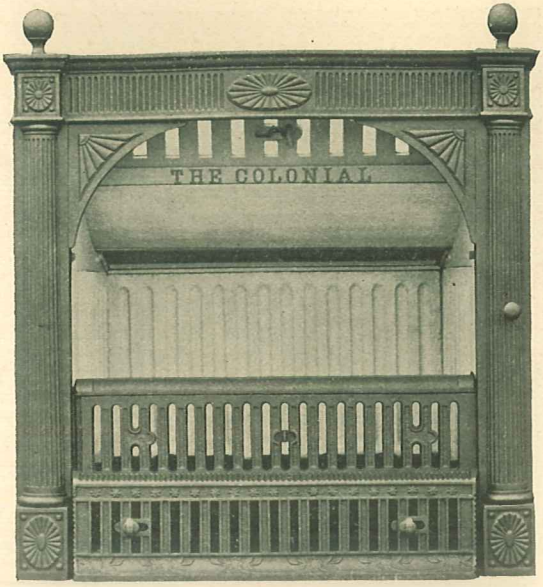
No. 1121. 30½ inches wide. 24 inch grate.

No. 1122-17. 30½ inches wide. 24 inch grate.
No. 1122-16. 24½ inches wide. 20 inch grate.

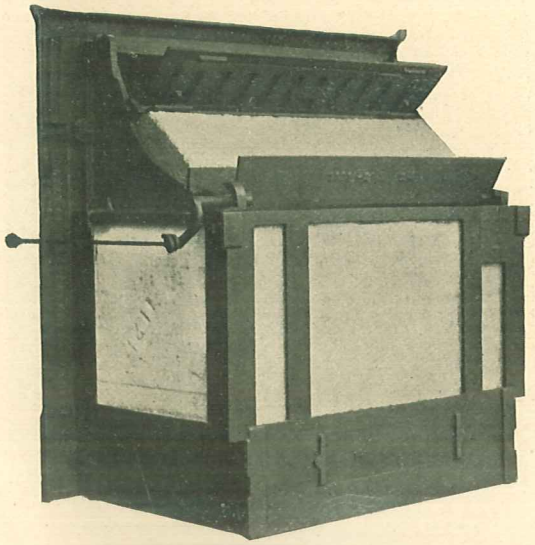


No. 1133. 30½ inches wide. 24 inch grate.

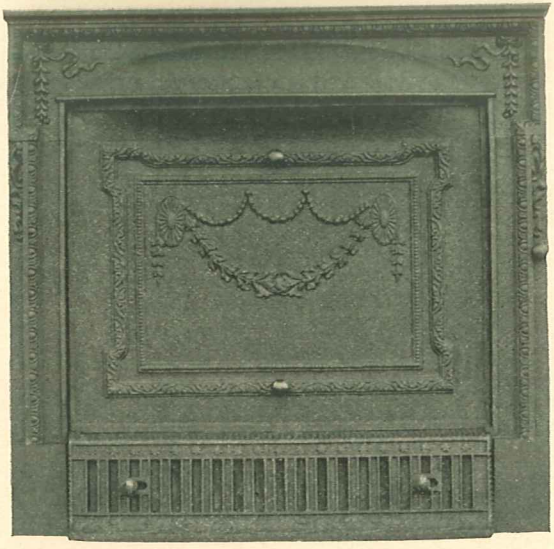
THE NEW MONARCH.



Open View of The Colonial.



Rear View of The Colonial.

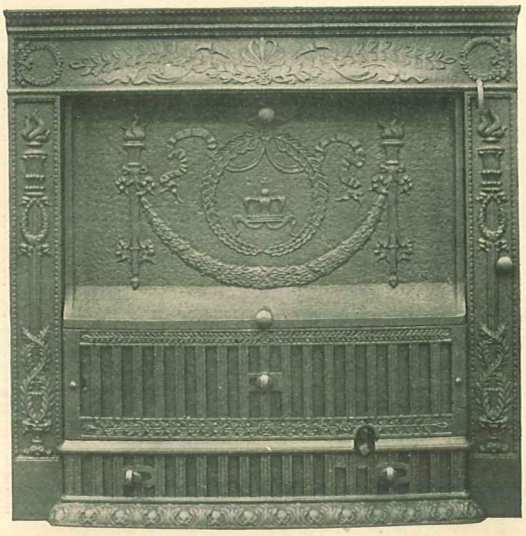


THE COLONIAL.

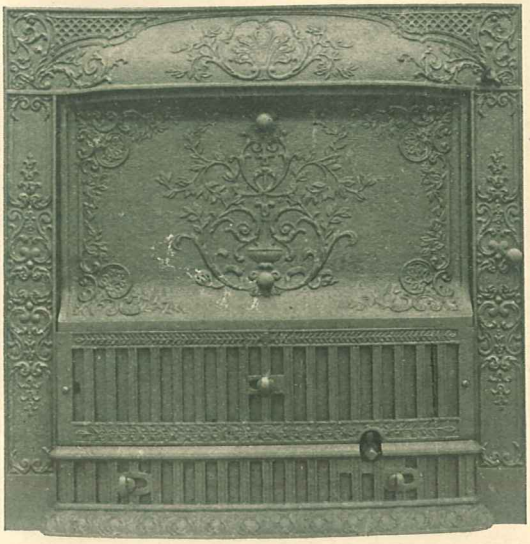
No. 1135. 30½ inches wide, 30¼ inches high. 24 inch opening only.

No. 1136. 30½ inches wide, 30¼ inches high. 24 inch opening only.

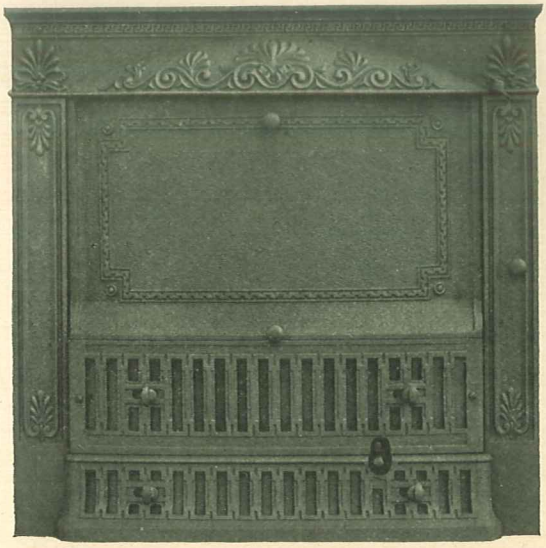
Has the same tile arrangement as the New Monarch. Upper damper throws back instead of operating with worm screw.

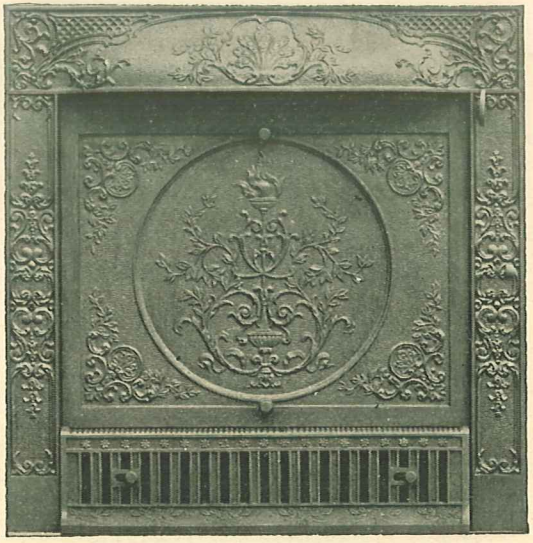


No. 1116-17. 30½ in. wide, 30¼ in. high. 24 in. grate.
1116-16. 24½ in. wide, 30¼ in. high. 20 in. grate.



No. 1110-17. 30½ in. wide, 30¼ in. high. 24 in. grate.
1110-16. 24½ in. wide, 30¼ in. high. 20 in. grate.





Summer Piece to the Crown Series of The Monarch.

No. 1123. 30½ in. wide, 30¼ in. high. 24 in. grate.

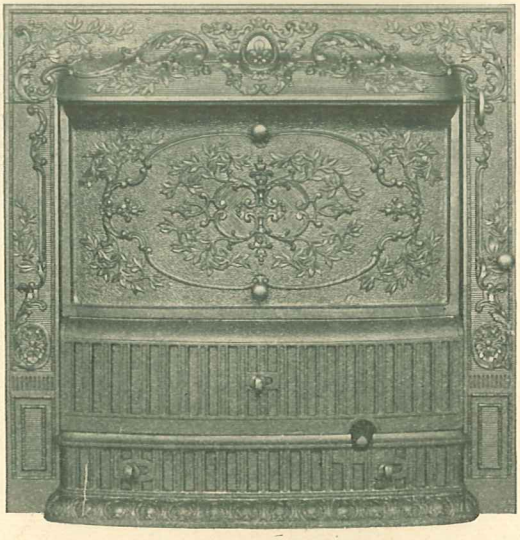
No. 1117. 30½ in. wide, 30¼ in. high. 24 in. grate.
1108. 24½ in. wide, 30¼ in. high. 20 in. grate

THE MONARCH.

No. 1104. 30½x30½ inches. 20 inch grate.

THE MAJESTIC.

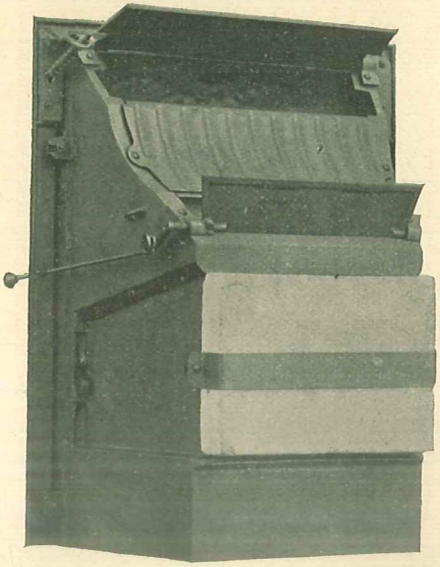
No. 1115-17. 30½ in. wide, 30¼ in. high. 24 in. grate.
1115-16. 24½ in. wide, 30¼ in. high. 20 in. grate.
This grate is constructed on same principle as the Monarch, but with medium weight shaker bottom. Extra wide space between the basket fronts, well plated.



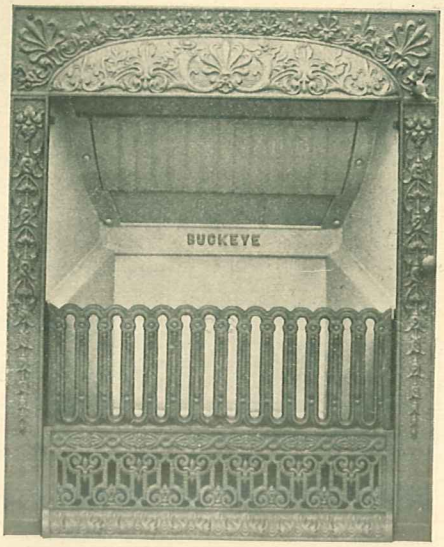
THE MONARCH "B."

No. 1113-17-24. 30½ inches wide. 24 inch grate.
1113- 17. 30½ inches wide. 20 inch grate.
1113- 16. 24½ inches wide. 20 inch grate.

This grate differs from the regular Monarch, in that the outside basket is removable; the shaker bottom is of medium weight; well plated.



Side view of the Buckeye Grate, showing curved top and damper attachments.



Open view of the Buckeye Grate, showing curved top which reflects the heat into the room.

THE BUCKEYE GRATE.

This Grate is now made with curved top, and our improved thumb-screw method of opening upper damper —same as in the Monarch—and for a medium price grate, suitable for soft coal, has no equal either in finish, construction or weight. All castings exposed to fire are heavier than any grate made of similar construction.

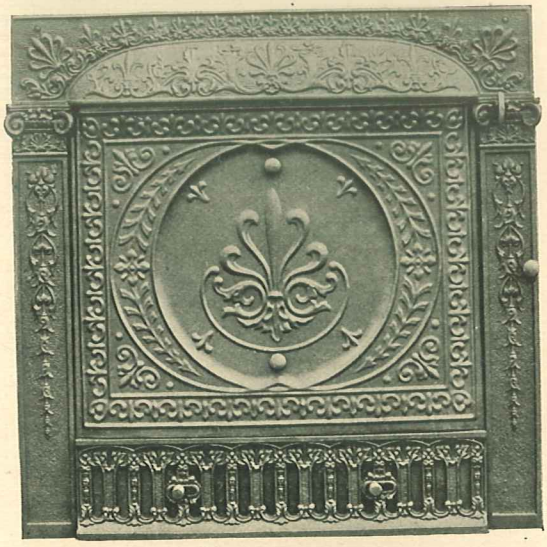
These Grates differ from the Monarch, in that they have fire tile in back only, with iron sides and air chamber which prevents burning out. The trunnions and back bar of the shaker bottom are not protected, though, as in the Monarch.

They are made either with shaker or dumping bottom, open or damper in ash screen.

As these Grates do not require any material in setting, have the double draft system, preventing smoking chimneys, we recommend them for all cases where a medium price grate is wanted.

No. 1047. 30½ in. wide, 30¼ in. high. 24 in. grate.

No. 1046. 24½ in. wide, 30¼ in. high. 20 in. grate.
Can be furnished with ash screen, same as No. 1047, at an additional cost of 40 cents.

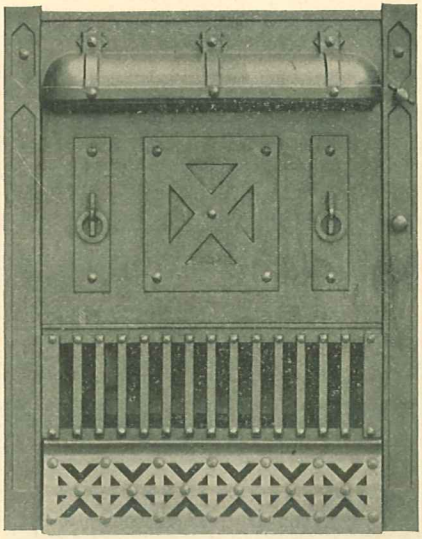


No. 1042. 30½ inches wide, 24 inch Grate.
1043. 24½ inches wide, 20 inch Grate.
Sheet Steel Summer Piece.

No. 1055. 24½ inches wide, 20 inch Grate.
1056. 30½ inches wide, 24 inch Grate.

THE BUCKEYE.

Made either Plain Dumping or Shaker Bottom.

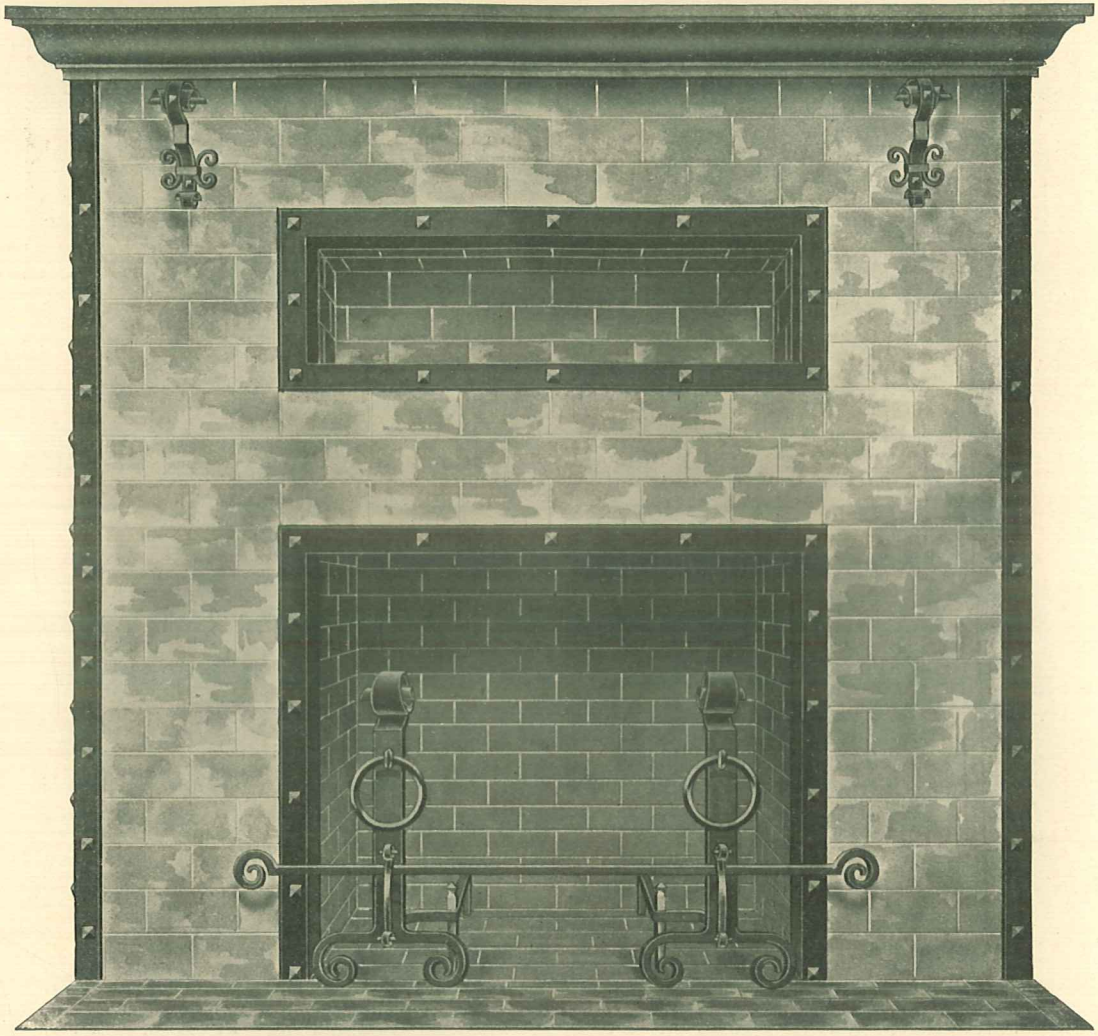


No. 1054-16. 24½ inches wide. 20 inch Grate.
1054-17. 30½ inches wide. 24 inch Grate.
Made either with plain dumping or shaker bottom.

No. 1035. 24½ inches wide. 20 inch Grate.
Made either plain dumping or shaker bottom.

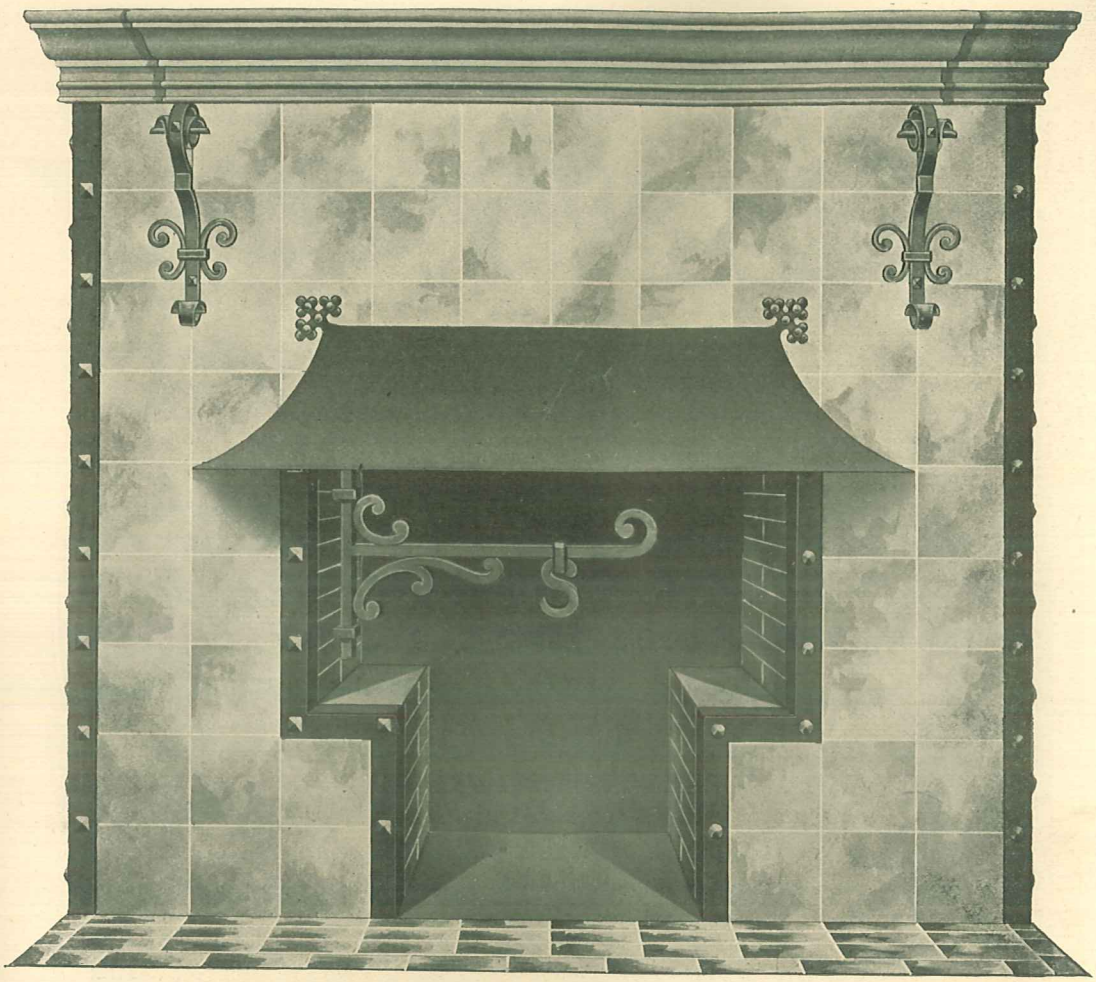
No. 1051-16. 24½ inches wide. 20 inch Grate.
1051-17. 30½ inches wide. 24 inch Grate.
Steel Summer Piece.

No. 1052-16. 24½ inches wide. 20 inch Grate.
1052-17. 30½ inches wide. 24 inch Grate.
Steel Summer Piece.



No. 1251. Wrought Iron Mantel Trimmings.

Made either Plain, Square or Hammered Bolt Heads.



No. 1245. Hob Grate.

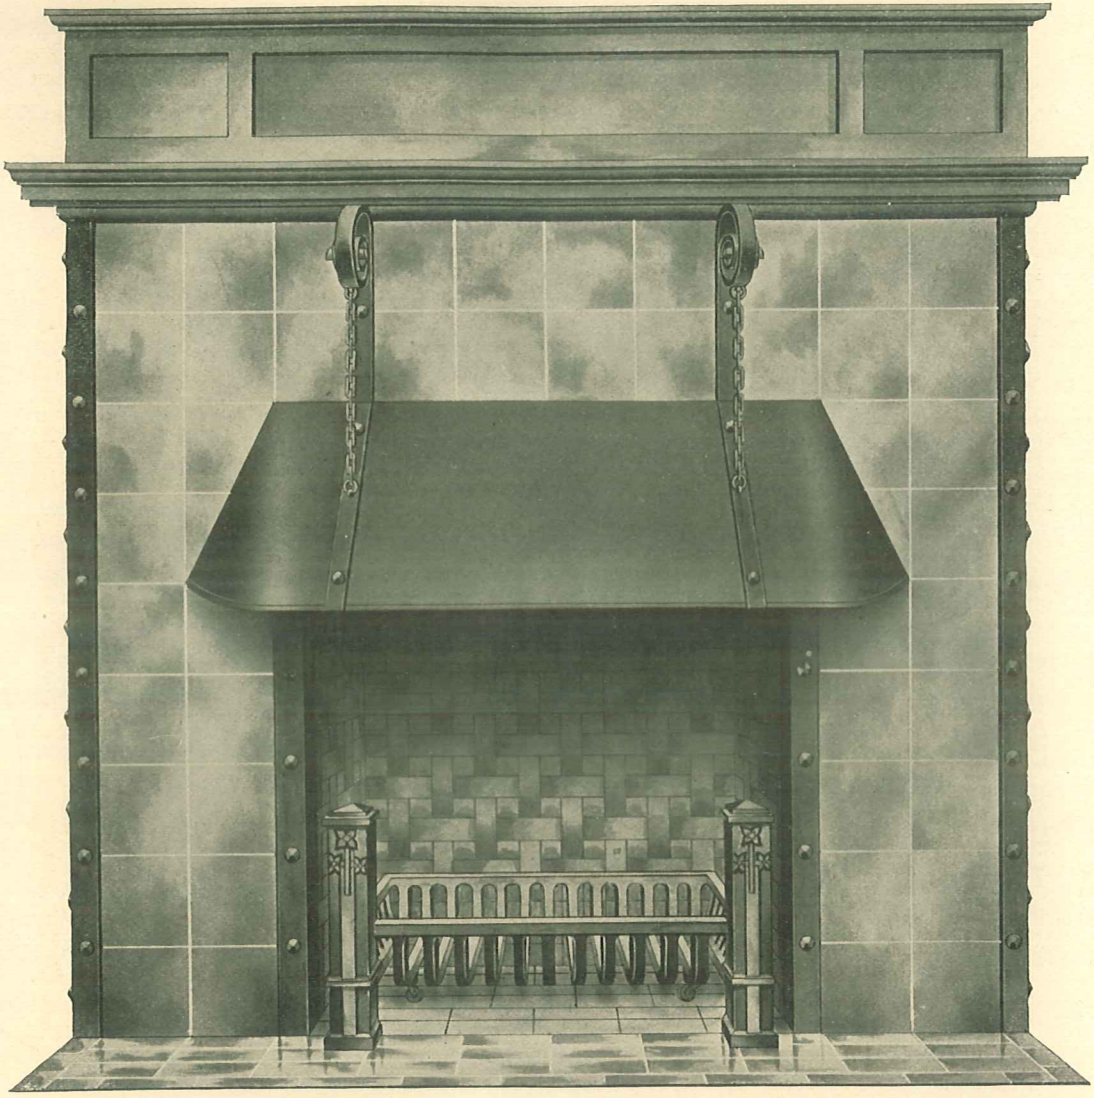
Can be used either with Andirons or Portable Basket.

Width of Frame, 36½ inches.
Height of Frame, 30½ inches.
Extreme Height, including Hood, 37¼ inches.
Width of Hood at base, 45½ inches.
Projection of Hood, 7 inches.

Depth of Hood, 8½ inches.
Grate opening, 21½ inches.
From floor to top of Hob Plates, 11¾ inches.
Width of Hob Plates, 6 inches.
Sizes contrary to this must be specified.

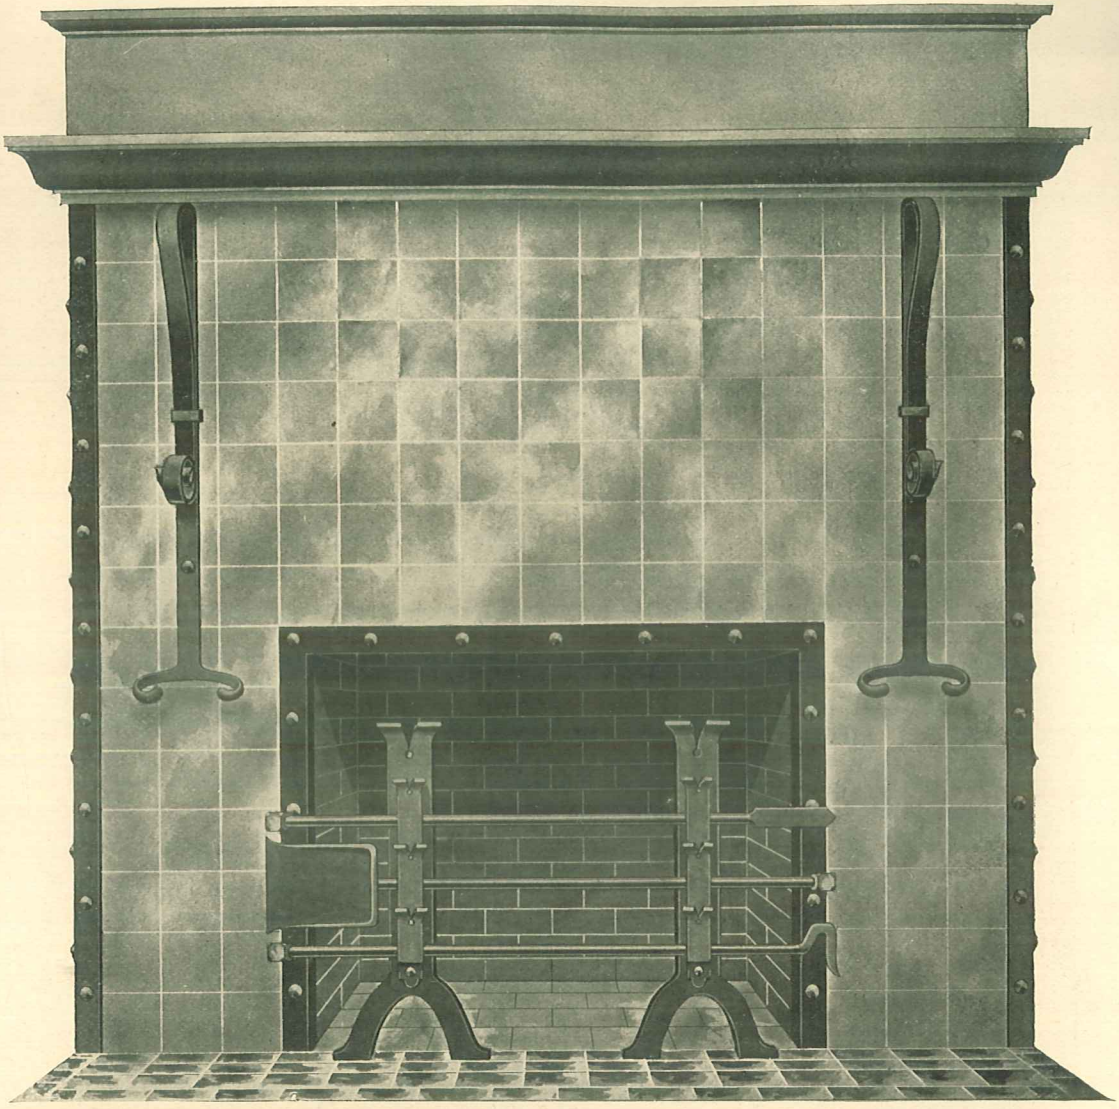
Both Square and Hammered Bolt Heads are illustrated in cut.

Hood double lined, resting on top of frame.



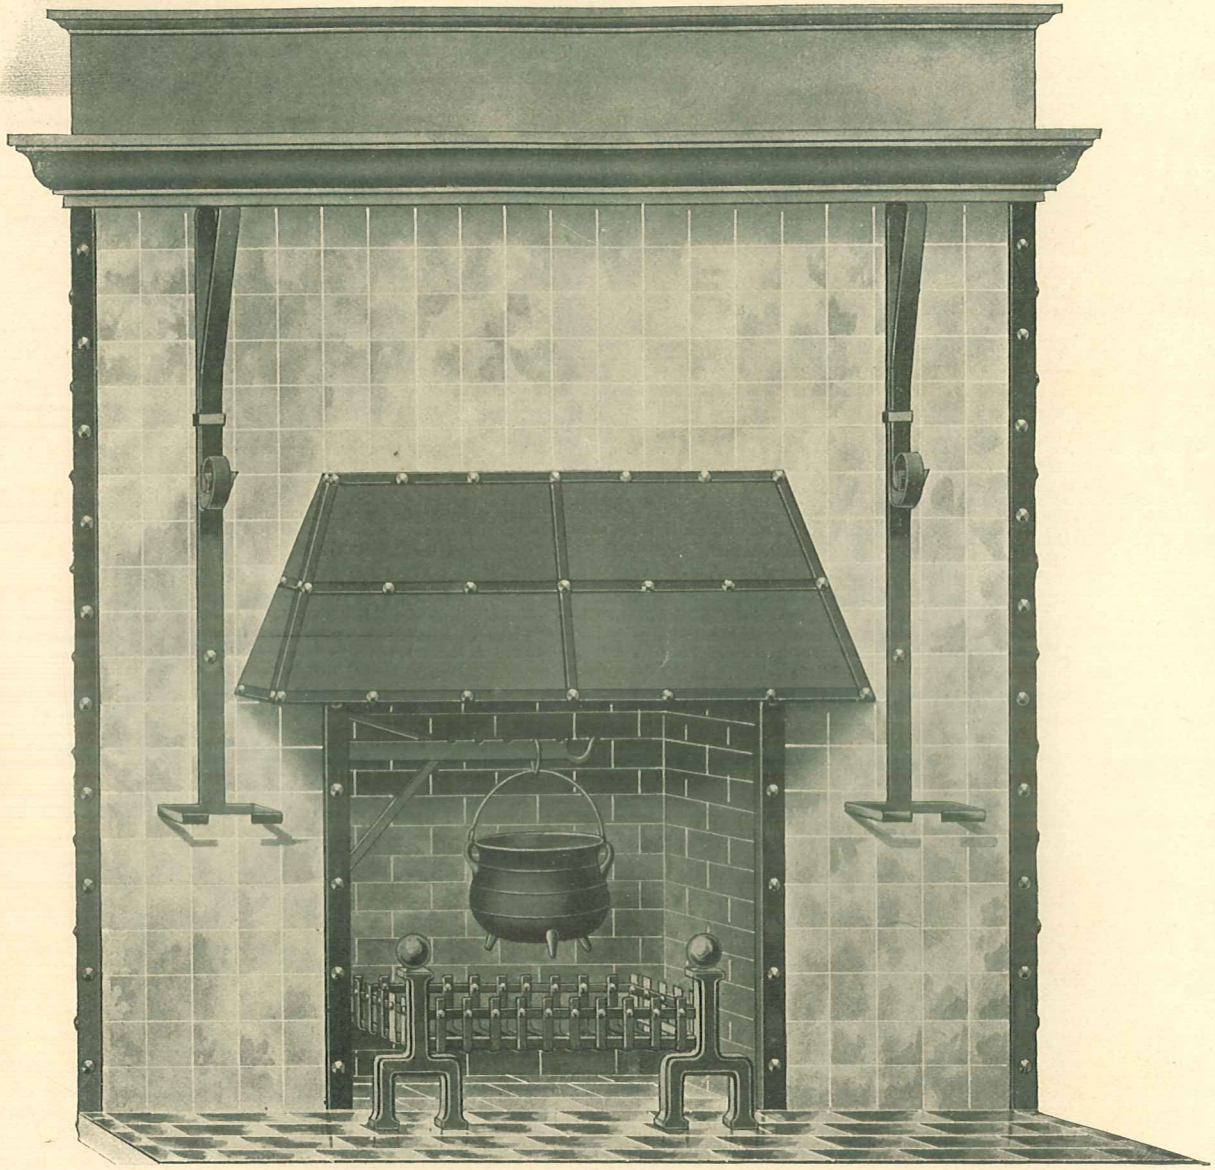
No. 1246.

Consisting of Frame, Hood, with Brackets attached, and Corner Angles.
Made either Plain or with Square or Hammered Bolt Heads.
Angles and Brackets made for 5-foot trimmings.
Length of Hood, 43 inches; width, 12 inches; depth, 7¾ inches.
Wood Basket No. 1523 (shown) is not included, and only sent when ordered.
Hood is double lined, resting on top of frame.
Special sizes to order.



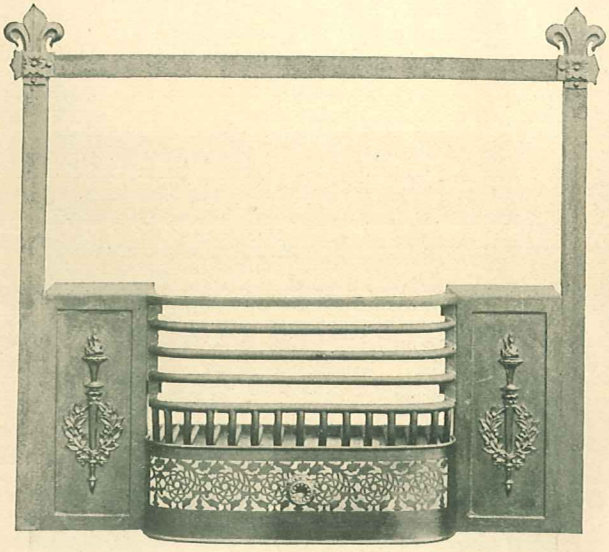
No. 1247.

Consisting of Frame, Corner Angles and Brackets.
Made either Plain, or with Square or Hammered Bolt Heads.
Corner Angles, 60 inches long.
Brackets, 34 inches long.
Andirons No. 1723 (shown) are not included.
Special sizes to order.

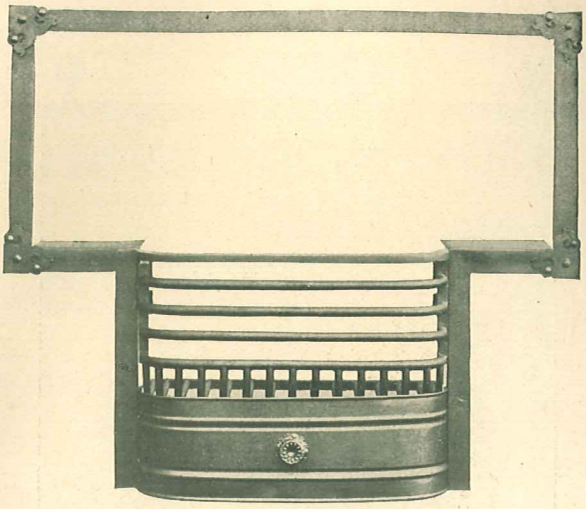


No. 1248.

Consisting of Frame, Angles, Brackets and Hood.
Made either Plain or with Square or Hammered Bolt Heads.
Brackets, 34 inches long.
Angles, 60 inches long.
Length of Hood, 43 inches; width, 16 inches; depth, 6 inches.
Hood double lined, resting on top of frame.
Wood Basket No. 1524 shown, but not included.



No. 1243.
36½ inches wide, 30¼ inches high.
Black.
Corners and Ornaments Cast Brass.
Brass Ash Screen with Pan attached.



No. 1242.

Old Colonial or Franklin Fireplace, 30½ inches wide. All Black, with Plated Brass Columns and Brass Knobs.

COMBINATION GRATES

AND

FRAMES AND SUMMER PIECES.

We illustrate on the following pages both of the above, giving numbers of each with the illustration.

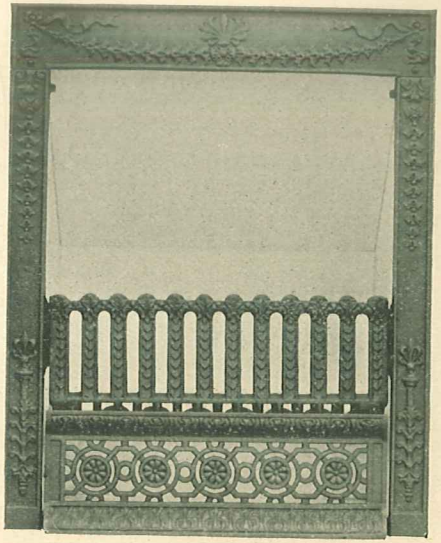
Combination Grates consist of frame, summer piece, basket and ash screen. All baskets have corrugated bottoms.

Baskets are made in two depths, 7 or 9 inch. K 7 inches deep will always be sent unless otherwise ordered.

Baskets and screens are always sent in black.

Frames and summer pieces do not include any grate or basket. Club House baskets are appropriate when a grate is required.

Can be furnished in any desired plating or black finish. Oxidized copper finish always carried in stock.



"K" BASKET.

7 or 9 inches deep.
18, 20 and 24 inch.
